

Albion Waste Supplier and Procurement Policy

Last Updated: 18 February 2024

1. Purpose

Albion Waste is committed to sourcing goods and services from suppliers who share our values of quality, integrity, and sustainability. This policy outlines our approach to selecting, evaluating, and managing suppliers and procurement activities.

2. Scope

This policy applies to all procurement activities and supplier relationships within Albion Waste.

3. Supplier Selection

Suppliers will be selected based on their ability to meet our requirements for quality, cost, delivery, and sustainability. We will conduct due diligence on all potential suppliers to ensure they have the necessary capabilities and credentials to support our operations.

4. Supplier Evaluation

Existing suppliers will be evaluated regularly to ensure they continue to meet our standards. This evaluation will consider factors such as product quality, delivery performance, customer service, and environmental impact. Any issues identified will be addressed through collaborative discussions and corrective actions.

5. Contract Management

All supplier agreements will be formalised through contracts that clearly define the terms and conditions of the relationship. Contracts will include provisions for quality standards, delivery schedules, pricing, and compliance with legal and regulatory requirements.

6. Ethical Procurement

Albion Waste is committed to ethical procurement practices. We expect our suppliers to adhere to ethical standards in their own operations, including compliance with laws on labour, health and safety, and environmental protection. We will not engage with suppliers who do not meet these standards.

7. Review

This policy will be reviewed annually to ensure it remains aligned with Albion Waste's procurement needs and ethical standards.
